EZ-SGI, the Smart LPG System
Easy Installing, Easy Calibrating!

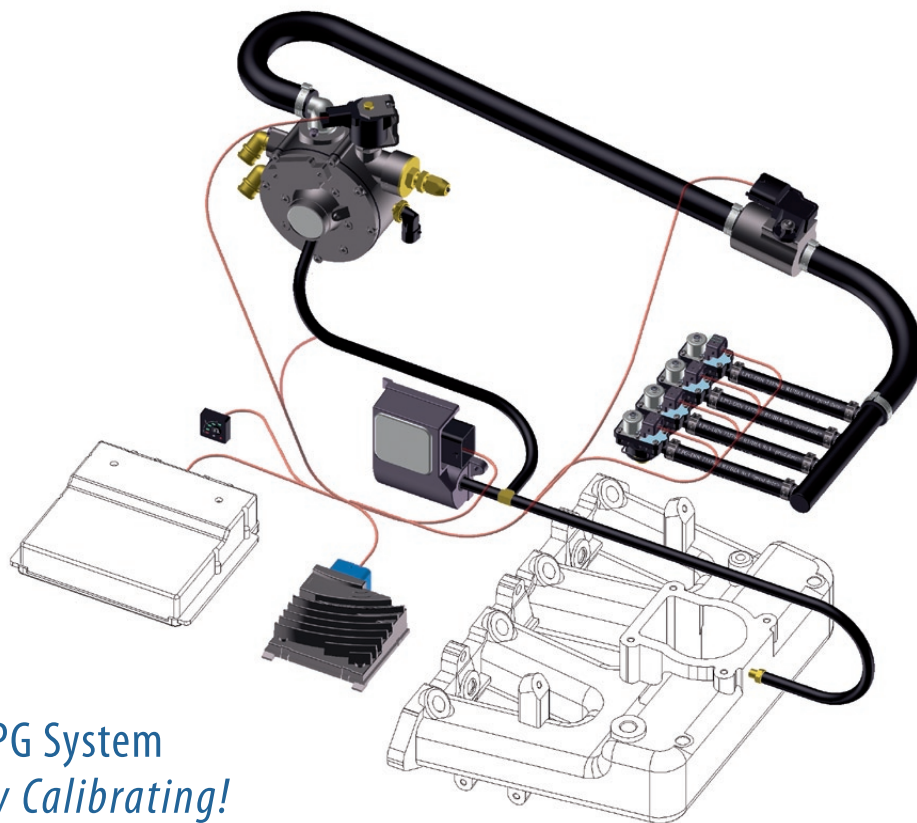

pure solutions...

EZ-SGI, the Smart LPG System

EZ-SGI is a breakthrough for the LPG industry and the key to convert vehicles to LPG without cost consuming development projects. The highly successful SGI system formed the basis of the EZ-SGI system and it allows to achieve near to similar characteristics of a dedicated sequential LPG injection system without using an existing vehicle specific calibration.

By utilizing state of the art software, EZ-SGI is able to deliver outstanding performance with a simple calibration tool provided to dealers and distributors.

EZ-SGI, the Smart LPG System *Easy Installing, Easy Calibrating!*

How it works:

1. Install EZ-SGI System software to a laptop.
2. Connect the laptop to the EZ-SGI ECM.
3. Enter in general settings regarding the base vehicle.
4. Test drive to create the unique calibration.

Simple and EZ!
